

SAFETY DRIVEN.

MUST-HAVE AERIAL SAFETY FEATURES

That Spartan delivers on.

✓ **Unrestricted Performance Capabilities**

All Spartan aerials can be operated safely and securely while flowing up to 1,500 GPM at any extension or angle.

✓ **Industry-Best Tip Loads up to 750 lbs. Dry or Wet, Unrestricted**

Spartan aerials can carry a heavier load and will remain stable and true even when fully extended or in windy conditions.

✓ **Self-Leveling System**

Once outriggers are deployed, a single button push automatically levels SSI-equipped trucks – decreasing setup and response time.

✓ **Electronic Positional Waterway**

Allows one-step waterway positioning to either Rescue or Water Tower from the turntable operator's position.

Only available on Smeal Rear-Mount Aerials

✓ **Retraction Override**

Retraction automatically stops as the the steps on the fly section near overlapping with the next lower section; this ensures crew safety and prevents potential injury.
