

AFTERMARKET PARTS
& SERVICE

**ALWAYS BE
READY TO
ANSWER
THE CALL.**

From aftermarket parts to a refurb, Spartan keeps you response ready.

Responding to multiple calls day after day, year after year, puts a lot of strain on your firefighting apparatus. Your crew and community can't afford to be without such an important tool in your 24/7 efforts to protect people and property. Maintenance is not just mandatory, it's a matter of life and death.

**The right part.
Right away**

Spartan ER has every aftermarket part you need to keep your rigs on the road. Made to fit and built to last, our quality authorized parts are OEM specified and ready to ship. Whether you order online or call, we understand the urgency and can usually get the part to you within 24 hours. All we need is your VIN number and address, we'll handle the rest. We can even design a new part to fit your rig's unique needs. So you can get back in service and serve your community without interruption.

**Why replace?
Refurb to practically new.**

Budgets are tight. Or getting cut. You can't afford the time and expense of ordering a new truck, engine or aerial. Our Spartan Refurb team has the expertise and technology to bring your old rigs back to life, whether it's been in a major accident or just showing its age. The same people who built your truck can rebuild and revitalize it within 90 days or less, at a fraction of the cost.

**Nobody knows ER apparatus
like Spartan.**

Our aftermarket team includes engineers and master techs who know every inch of your truck, engine or ambulance. Whether it was built by Spartan or not. Anything under the hood, including all electrical and computer systems can be repaired or replaced—efficiently, correctly and quickly. Our Charlotte facility alone has 15 bays ready and able to cut service times faster than your city government cuts budgets. Just like you, we work with urgency and efficiency to get the job done right, right away.

**From inspections to
response assessments.**

As the original equipment manufacturer, Spartan has comprehensive and convenient solutions for inspections, including pump tests, ladder, and UL testing. We can provide safety audits and make resulting upgrades to protect your crew and meet NFT standards. We also offer rig or full fleet use, volume and daily/weekly response assessments to identify parts that may need to be replaced before they fail. So your equipment is running safe and working optimally. It's preventive maintenance that could prevent a major catastrophe.

**Add 7-10 years in
90 days or less.**

As you know, it's all about response time. In a matter of weeks, your Spartan ER dealer can pick up your rig, get it to one of our certified refurb facilities and deliver it back almost as good as new. From new paint and pump repair to engine and transmission rebuilds or full chassis replacements, we'll bring new life to your trucks. And even add 7-10 of service life that you never knew you had.

SPARTAN MOTORS

**Make the call.
To answer every call.**

Your job is to be ready to respond. You need every piece of equipment performing at its peak. Contact your Spartan ER dealer to find out more about our aftermarket parts and refurb programs. We'll keep you running strong when your crew needs us most.
